Assistant Vice President – Risk Management

Re: Mexico Travel Warning and Spring Break Considerations

As we move toward Spring Break, WTAMU would like to emphasize the importance of travel precautions in Mexico. The State Department has listed a travel warning for Mexico. Travel Warnings are issued when long-term, protracted conditions make a country dangerous or unstable. The State Department recommends that Americans avoid or consider the risk of travel to that country.

South Padre Island is a favorite destination of those participating in Spring Break and crossing the border into Mexico is a possible destination. As is always the case with international travel, precautions for medical and security safety are critical. We want you to be aware and to take appropriate precautions.

The State Department has provided a Mexico Travel Warning website with helpful information regarding travel in Mexico:

(http://travel.state.gov/content/passports/english/alertswarnings/mexico-travel-warning.html)

Thank you.
