

**Data Bite # 4 – Grade Distribution Dashboard**

Available at: [wtamu.edu/ie](http://wtamu.edu/ie)  
Grade Distribution Tab

**Grade Distribution Dashboard**

Are you aware that a dashboard exists that shows grade distributions for the last 12 years? Institutional Effectiveness often gets questions about which courses have high drop/fail/withdraw (DFW) rates, which classes are the most problematic, or grade summaries for this course over the past five years.

This dashboard allows everyone (faculty, staff, students and parents) to find the answers to these questions at any time through searching within this dashboard.

The dashboard has several unique features:

- Average GPA per course by professor
- DFW % rate
- AB % rate
- A download ready feature to be able to manipulate these values in Excel

For direct access to this dashboard please click [here](http://wtamu.edu/ie).
